

Picote Lining Cannon

Picote Solutions CIPP Lining Tools

The Picote Lining Cannon’s compact design and extremely light weight enables lining where inversion drums just can’t reach.

The Picote Lining Cannon’s compact design and extremely low weight are constructed from heavy-duty transparent polycarbonate and aluminum.

The transparent body allows you to watch the liner inversion in real time giving you more visibility and control.

Either of the two sizes come with multiple inversion heads and a Fast Cap. The Fast Cap allows you to shoot a liner, clamp it, then disconnect the Cannon and install the fast cap, reconnect your air hose, release the clamp, and then immediately use the Cannon again for another liner install.

- Compact and lightweight design makes them extremely portable.
- Transparent body allows you to watch the liner inversion in real time giving you more visibility and control.
- The camera insert creates an airtight seal around the camera line, keeping the liner inflated, while allowing you to push the camera down the pipe for inspection prior to curing.
- Built in pressure relief control.
- Maximum operation pressure of 2 bar (29 psi).
- HPWJ tested to 180 bar by WRC*

Technical Specifications

Category	Measurement
----------	-------------

Mini Cannon

Empty Weight	4.8kg (10.5 lbs)
--------------	------------------

Full Weight	10kg (22 lbs)
-------------	---------------

Weight	18kg (40lbs)
--------	--------------

Liner Capacity

DN50 (2")	7.5m (24.5 ft)
-----------	----------------

DN75 (3")	5m (16.5 ft)
-----------	--------------

DN100 (4")	3.5m (11.5 ft)
------------	----------------

Original Cannon

Empty Weight	6.2kg (14lbs)
--------------	---------------

Full Weight	15 kg (33 lbs)
-------------	----------------

Liner Capacity

DN50 (2")	15m (49 ft)
-----------	-------------

DN75 (3")	10m (33 ft)
-----------	-------------

DN100 (4")	7m (23 ft)

S1E Limited Specialist Suppliers of Trenchless Technology

No-dig Pipeline Repair

S1E Limited is a specialist supplier of trenchless technologies to the drainage repair industry. The company focuses on sourcing quality products for professional use. They are all tried and tested in the field to produce impressive results. S1E distributes high-quality products from market-leading manufacturers for the drainage repair industry. Products include camera inspection systems, cutting and cleaning tools, CIPP lining equipment and consumables, mechanical point repair devices, rat blockers and other site consumables.

S1E Limited is committed to being a quality supplier, with a focus on customer service. S1E is proud to be an active member of the UK Society for Trenchless Technology.

First established in 2007 as Fernco Environmental, the company’s mission was to seek out repair products for the infrastructure repair and water management markets. Since 2016, it has re-focused its ranges to the specialist field of trenchless repair, with a growing portfolio in this specialist area.

The company is owned by Cooper Companies Inc, a US-based leader in the production of pipe couplings. The Group also owns companies in Canada, Mexico, Brazil, Germany and France, as well as the UK-based sister company to S1E, Fernco (previously, Flexseal).

It is accredited to ISO 9001: 2015 for its Quality Management System. It is also accredited to ISO 14001: 2015 for its Environmental Management System.
